The DataGame e-Book is not your typical guide to the world of data privacy in adult education.

First of all, it spans way beyond the sphere of adult education, as it provides a comprehensive summary of the GDPR and its derogatives that apply to the education sector in general.
It also includes best practices, success stories, and a regulatory landscape overview that you could rarely find written elsewhere in such an engaging and outside-the-box format.

Secondly, while tailored for its target groups of education representatives living in Austria, Bulgaria, Cyprus, Greece and Ireland, its two quizzes and competence framework capturing the data privacy knowledge curve and learning attitudes that can be applied by anyone interested in the topic.

Last, but not least, in here you will find an abundance of useful links and videos which truly make it a repository of knowledge and guidance in both a social and cultural context when dealing with privacy issues of the contemporary digital world we find ourselves in.

As the first output of the DataGame Erasmus+ European Project, this is an e-Book for anybody interested in data privacy and protection - from those wondering what data privacy it is and whether it matters at all, to experts and decision makers well vested into the expansive world of cybersecurity.
